THE DIFFERENCE HS MAKES

Building Leaders for today & tomorrow
Creating high performing Teams
Ensuring sustainable Organisational performance
INSPIRING YOUR PEOPLE. PROPELLING YOUR BUSINESS
WE HELP YOU DEVELOP LEADERS, TEAMS, AND ORGANISATIONAL CULTURES THAT DRIVE ENGAGEMENT, INNOVATION, AND PERFORMANCE

WHO ARE HUMAN SYNERGISTICS

We specialise in developing and providing proven change strategies, diagnostics and education that enable individuals to reach their potential, groups to realise synergy, and organisations to achieve outstanding results.

Global Coverage
- Over 46 yrs of experience
- 19 Offices worldwide
- Accredited Practitioners in over 54 countries
- Used for commercial and educational purposes:
  - 229 of Fortune 500 companies
  - All of the Top 10 Fortune 500 companies
  - 490+ Universities

Australian Presence
- Operating in Australia for over 25 yrs
- Over 2,500 Accredited Practitioners
- Consultants in Australia and New Zealand
- Used for commercial and educational purposes:
  - 127 of the top 200 ASX companies
  - 9 of the Top 10 in the ASX 200 companies
OUR MISSION

Changing the World – One Organization at a Time®

HELPING INDIVIDUALS, GROUPS & ORGANISATIONS UNDERSTAND THE VALUE OF CONSTRUCTIVE THINKING AND BEHAVIOUR TO MAKE THEM MORE EFFECTIVE.
Human Synergistics utilises an integrated approach to create sustainable performance outcomes. Research has shown that effectiveness at an individual, team, and organisational level is driven by thinking, behaviour, and expectations of behaviour. Human Synergistics has developed and uses the world’s leading diagnostics in conjunction with consulting solutions to transform leaders, teams, and organisational culture.

The Diagram below illustrates the ripple effect of a leader’s thinking and behaviour on those they lead, followed by the culture they create and how customers experience their organisation.

**WHY**

**HUMAN SYNERGISTICS**

Research and development by Robert A. Cooke Ph.D; J. Clayton Lafferty Ph.D.

**HOW**

**THE CIRCUMPLEX**

If you agree with the adage that "a picture’s worth a thousand words", you’ll understand the beauty of the Human Synergistics Circumplex.

It provides a visual model and common language for developing Constructive styles in individuals, managers, leaders, teams, and organisations.

A ground-breaking innovation when it was developed more than 40 years ago, and regularly reviewed and refined since then, the Circumplex has been applied and endorsed by millions of clients around the world – a true testament to its validity, relevance, and value.
WHAT IS IT? WHY USE IT?

Effective individuals are aware of how their own thinking influences their ‘take on life’, how they respond to others, and the impact their behaviour has on those around them. Providing such feedback to people, particularly those in leadership roles, is an important part of developing their effectiveness.

The Life Styles Inventory™ (LSI) enables individuals to think and behave to their full potential. It’s particularly valuable for helping individuals to:

- Discover new ways of thinking and behaving.
- Improve their effectiveness in their roles.
- Cope better with stress, pressure and change.
- Apply more flexible and creative thinking.
- Improve their interpersonal relationships.
- Increase their personal effectiveness.

The LSI is a measurement and feedback tool designed to help individuals identify how their thinking and behaviour are helping or hindering their satisfaction and effectiveness. It is made up of two parts:

**LSI1: Self-Description** – Measures personal thinking styles and relates these to perceived effectiveness (self-efficacy) and satisfaction at work and at home. This can be a stand-alone instrument.

**LSI2: Description by Others** – Colleagues describe their experience of the individual’s behaviour. A Consultant or Coach helps the individual develop improvement strategies for building greater personal satisfaction and effectiveness.
### Developing Individuals

Group Styles Inventory™ (GSI)

THE GROUP STYLES INVENTORY™ PROVIDES DATA ON TEAM BEHAVIOUR AND PERFORMANCE

WHAT IS IT? WHY USE IT?

When teams perform at the best of their abilities, it's magic! But teams can get stuck in a cycle of ineffective behaviours: working against rather than with each other, busting instead of building ideas, discussions that go around in circles, nodding in agreement with a decision but not following through with action.

The Group Styles Inventory™ (GSI) is the only research-based tool that provides a valid and reliable measure of how people in groups interact with each other and work as a team to solve problems. Using the GSI helps teams to:

- Talk about team behaviours and the "elephants in the room" in a safe way.
- Have the conversations that matter.
- Illustrate the impact behaviours have on group performance.
- Create a platform to improvement planning for enhanced performance.
- Produce reliable data to use as a base for evaluation and change.
- Improve an individual's ability to work as part of a team.
- Allows group members to clearly identify what is helping or hindering the team in its efforts.

The GSI provides group members with the insights to talk about their behaviour and how it affects the group's performance.

Through highlighting factors that are helping or hindering their teamwork, it empowers them to change the way they operate as a team and therefore behave. This leads to better cooperation, communication and consensus, more innovative thinking and better-quality decisions.

Designed for both project teams and work groups that are responsible for solving problems and making decisions. It can be used as a continual improvement exercise or when a group is embarking on, is partway through, or has completed a problem-solving process.

Leadership/Impact® (L/I) & Management/Impact™ (M/I)

HELPING LEADERS AND MANAGERS UNDERSTAND THE IMPACT THEY HAVE ON OTHERS

WHAT IS IT? WHY USE IT?

Leaders set the agenda for culture – they model the behaviours that others follow and, through their own leadership, cause others to behave in certain ways that may or may not be consistent with what the leader actually desires. Effective leaders are aware of the impact they have on others.

Leadership/impact® (L/I) is a measurement and feedback tool designed to help those in leadership positions identify the relationship between how they lead, how this impacts on the behaviours of others and how effectively they operate in the leadership role. It comprises two parts:

- Ideal impact and leadership strategies – The leader describes the behaviours he or she would like to promote in the people they lead. The leader also identifies how they lead in terms of 10 strategies.
- Actual strategies, impact, and effectiveness – The leader selects colleagues who then provide feedback on the leader. This includes behaviours they believe the leader promotes through their leadership, how they observe the leaders performance in the 10 strategies, and the leader’s effectiveness in their role.

Designed for managers, Management/Impact™ (M/I) measures the critical functions, their management approaches, and the impact these have on others’ behaviour and performance. It comprises two parts:

- Ideal impact and management approaches – The manager describes the behaviours he or she would like to promote in the people they manage. The manager also identifies how they carry out their role in terms of 15 management approaches.
- Actual approaches, impact, and effectiveness – The manager selects colleagues who then provide feedback. This includes behaviours they believe the manager promotes, how they observe the managers performance in the 15 approaches, and the manager’s effectiveness in their role.

Leadership/Impact® (L/I) and Management/Impact™ (M/I) helps leaders and managers understand the impact they have on others.
IMPACT ON PERFORMANCE

THE EXTENT TO WHICH THE LEADER MOTIVATES OR DRIVES PEOPLE TO BEHAVE IN CONSTRUCTIVE, PASSIVE/DEFENSIVE OR AGGRESSIVE/DEFENSIVE WAYS

Organisational Culture Inventory® (OCI) & Organisational Effectiveness Inventory™ (OEI)

THE OCI & OEI PROVIDE DATA ON ORGANISATIONAL CULTURE, WHAT’S CAUSING IT, AND THE OUTCOMES FROM IT

WHAT IS IT? WHY USE IT?

Organisational culture directly impacts on the performance of the organisation. It influences how the organisation goes about executing its existing strategy and how effectively it adapts to changes in its operating environment. Improving organisational culture establishes a foundation for future performance.

The Organisational Culture Inventory® (OCI) measures an organisation’s ideal culture and the actual operating culture. It specifically examines culture from the perspective of behavioural norms – how people believe they are expected to behave in order to fit in and thrive (or sometimes survive).

The Organisational Effectiveness Inventory™ (OEI) measures the practices used throughout the organisation that cause the current climate and how that shapes the current culture. It also measures a number of research-based outcomes of the culture at the individual, group and organisational level.

The OCI/OEI work together to give you a complete picture of your organisation’s culture (the behaviours) and factors driving it – and, in turn, the behaviours the culture reinforces. The OCI/OEI measures both culture and climate to provide invaluable data on how they’re connected, giving you the insights you need to create a more constructive culture and improve effectiveness.

The OCI/OEI is invaluable for:

• Identifying targets for change and improvement and building the case for change

• Providing reliable feedback for planning change with a common model and language that can be applied for development across all levels of your organisation

• Supporting programs to enhance strategy implementation, employee engagement and inclusion, quality and reliability and/or customer service

• Monitoring and managing culture and climate over time to measure progress and identify what’s working and what’s not

Organisational culture directly impacts on the performance of the organisation. It influences how the organisation goes about executing its existing strategy and how effectively it adapts to changes in its operating environment. Improving organisational culture establishes a foundation for future performance.
HOW CULTURE WORKS

OUR HOW CULTURE WORKS MODEL ILLUSTRATES A CAUSE AND EFFECT MODEL OF CLIMATE, CULTURE AND ENGAGEMENT

- THE PREFERRED CULTURE REPRESENTS "WHAT SHOULD BE EXPECTED HERE"
- THE CAUSAL FACTORS REPRESENTS "THE WAY THINGS ARE DONE AROUND HERE"
- THE ACTUAL CULTURE REPRESENTS "WHAT'S EXPECTED AROUND HERE"
- THE OUTCOMES REPRESENT "HOW WE'RE DOING HERE"

WHAT IS IT? WHY USE IT?

Research shows that the ways in which service providers approach their work are quite visible to customers and shape customer’s perceptions, attitudes and future behaviours with respect to the organisation’s products and services. The ways in which service providers interact with customers are the main determinant of customer satisfaction, loyalty and advocacy.

A reputation for quality – whether positive or negative – is earned by providers but is promoted by customers. Knowing how behaviours impact service quality, isolating the specific behaviours that do this, and then systematically focussing on changing these, can be directly linked to improvements in measurable outcomes like sales/revenue, along with increased customer satisfaction, loyalty and advocacy.

The Customer ServiceStyles™ Inventory (CSS) measures the behaviours customers and clients experience when interacting with your organisation. This diagnostic helps you understand the relationship between your organisational culture and the quality of customer experience.

Organisations can measure the experience of both internal and external customers. CSS is particularly valuable for:

- Discovering why your customers are satisfied or dissatisfied
- Gauging the extent to which your organisation is living up to its mission and brand promises
- Understanding the impacts of your organisation’s culture on customer service
- Validating the need for change
- Monitoring and evaluating customer service initiatives
